The Story

At Sarinas we have a passion to deliver luxury branded products, excellent customer service, and the dedication to be successful in every aspect of our business. With hard work Sarinas Fashion has grown to include some of the most recognized European & North American brands. We continue to deliver a gold standard in distribution as our team continues to add new product lines and brands to our network. Backed by our experienced merchandising team and our strength in global supply chain, we positioned ourselves for continued success.

2014

In our first year of business, we developed relationships with major luxury brands and introduced these desirable product lines.

We successfully paired these product lines and luxury brands with our innovative web based platform propelling us in the digital age.

Sarinas accrued the biggest growth of users to our database, exceeding all projections in our first year.

2015

We shifted focus to the European market. Expanding to include product lines and brands from Italy, France, and United Kingdom.

With these expansions we exceeded our annual projection by **+59%**

2016

By this time we reached a **75%** increase of active users, while **50%** were repeat customers.

We expanded the Sarinas' product lines from handbags and small leather goods to include apparel, footwear, jewelry, sunglasses and watches.

2017

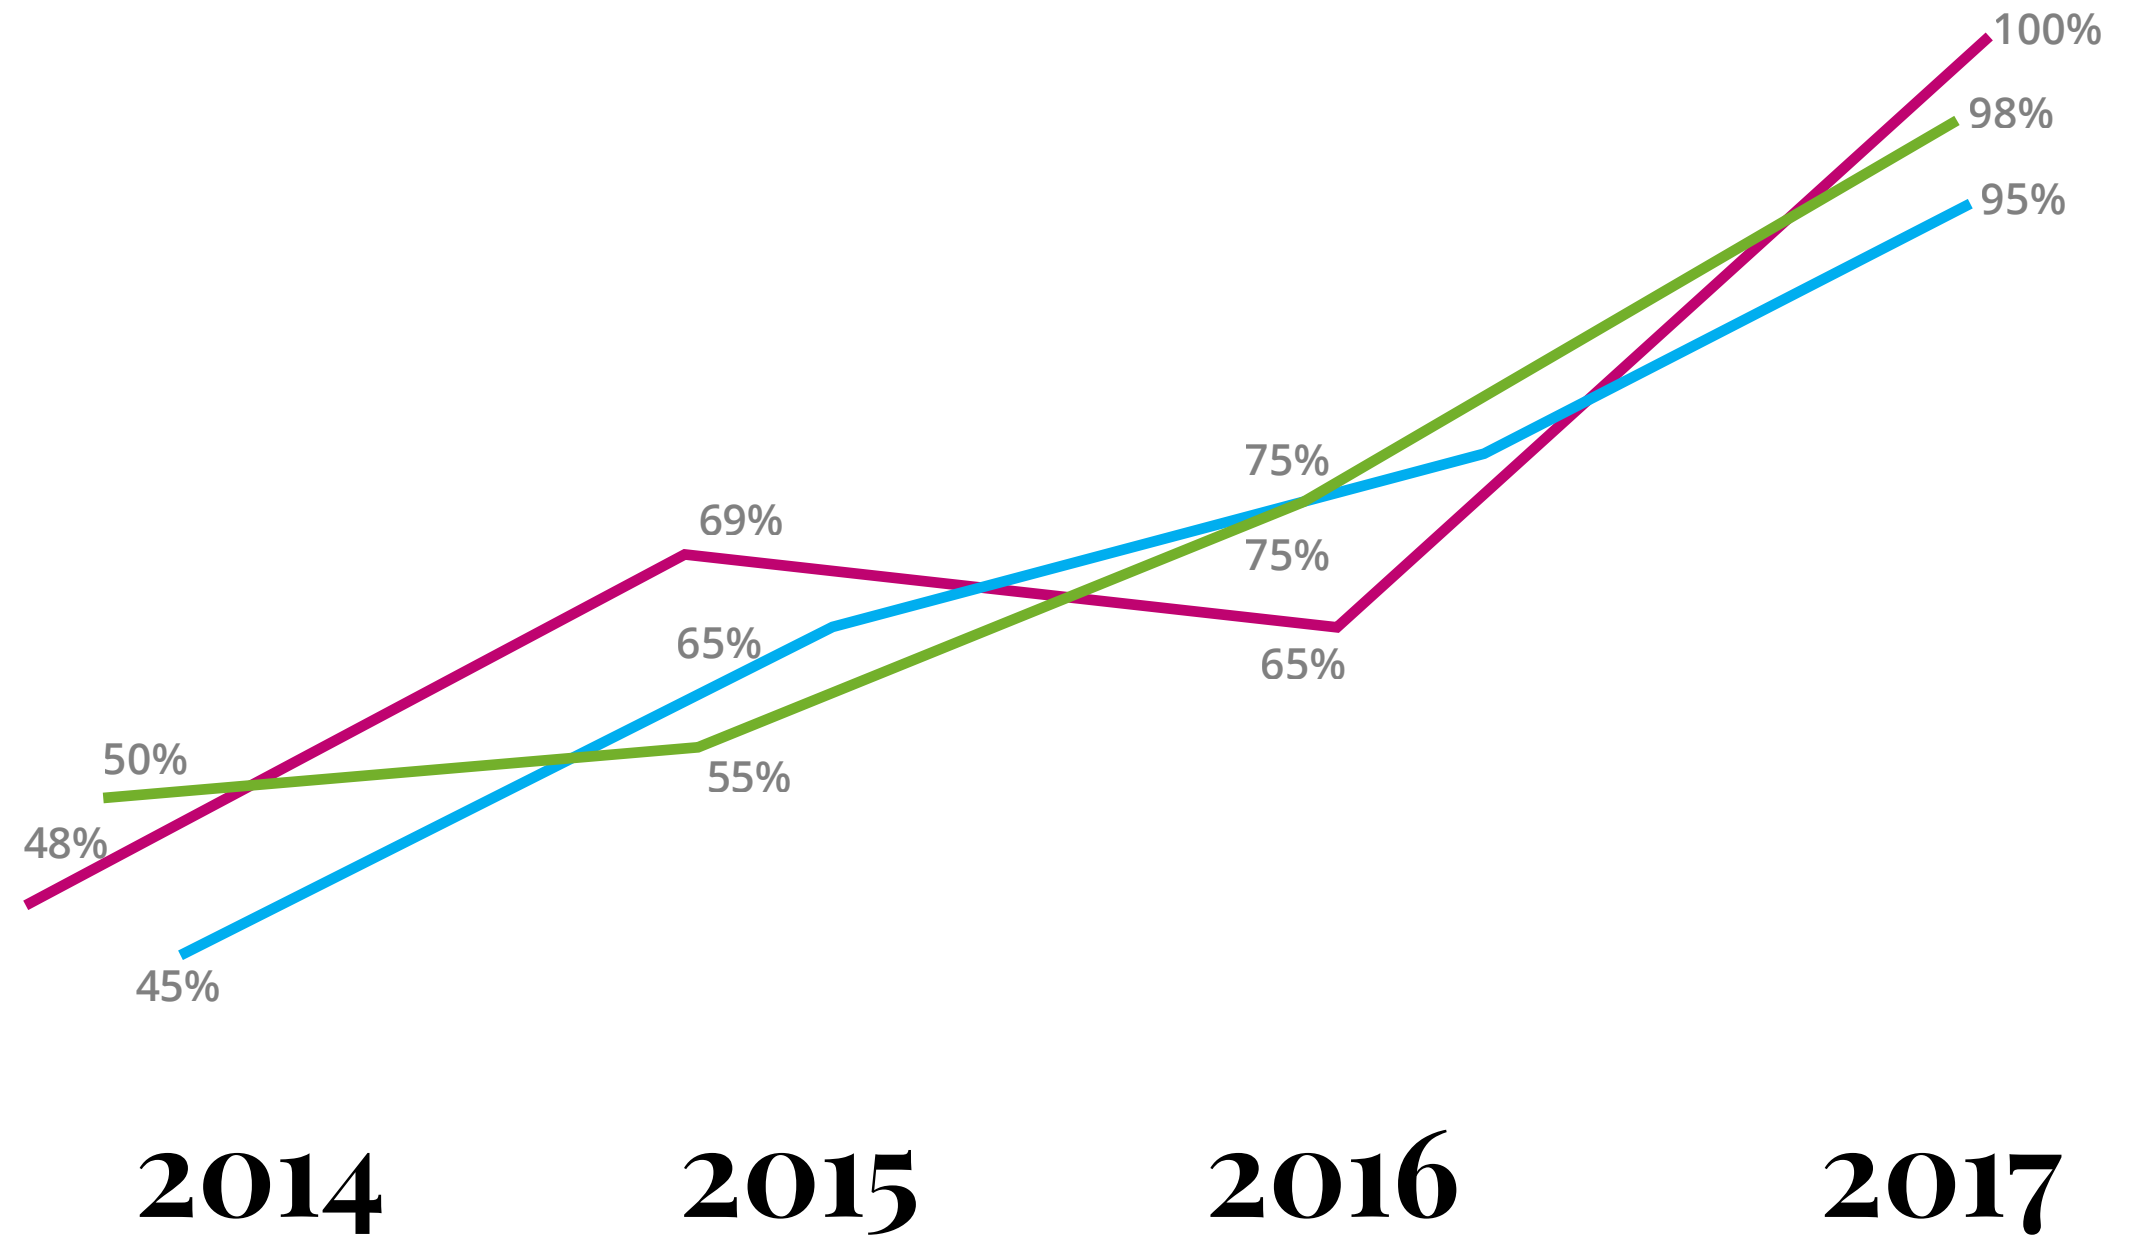

As we diversify, we have implemented daily connection with our users providing quick access to inventory through our online platform.

With highly competitive pricing and our continuously evolving platform, we are expecting our user database to double by the end of 2017.

Growth
